NATIONAL ENVIRONMENTAL HEALTH ASSOCIATION ANNOUNCES FREE CONTINUING EDUCATION THROUGH E-LEARNING

DENVER (July 20, 2009) - The National Environmental Health Association (NEHA) announces NEHA's newest member benefit: free continuing education credits through NEHA e-Learning.

NEHA began a relationship with the Center for Environmental Research and Technology, Inc. (CERTI) in 2006 to bring a variety of environmental health education on-line. Since that time, CERTI has taped, edited and posted on-line over 120 conference sessions, workshops and trainings, which are now available free of charge through NEHA's web site. As approximately 40 new courses are added each year, anyone can experience experts from leading organizations addressing today's most pressing environmental health topics from anywhere there is on-line access.

All of NEHA's e-Learning programs offer continuing education credits, and NEHA members receive the credits for free. Non-members have to pay a small fee for the credits but are still able to view all programs at no charge. Plus, continuing education courses completed through NEHA e-Learning will be automatically added to members' credential account – no additional paperwork or submission forms to fill out.

NEHA is able to offer this vast array of information and free courses thanks to NEHA's Partners in Education. Our business partners not only allow us to tape, edit and host education courses, but as additional sponsors join us in pursuit of more readily available online education, NEHA is researching new products and programs to further increase our free e-Learning options.

About NEHA

The National Environmental Health Association (NEHA) was incorporated in 1937 to create a national professional society for environmental health practitioners. For the more than 5000 individual, organization and college members, NEHA's mission, "to advance the environmental health and protection professional for the purpose of providing a healthful environment for all" is represented in the services provided for the profession. NEHA offers seven national credentials, produces an Annual Educational Conference and Exhibition, publishes the widely-respected and peer-reviewed *Journal of Environmental Health*, serves as a "one stop shop" for publications in virtually every area of the environmental health field through its online bookstore, posts job openings on its online JobCenter, provides networking and committee participation opportunities, develops positions on timely and serious environmental health concerns, and provides several other services, serving as a constant resource for the environmental health and protection professional.
